## Summary

*A research fellow of the Japan Society for the Promotion of Science (JSPS) • Studying code reviews which laid the groundwork for a rapidly-growing research community that has industrial interests • Board network collaborators from institutions in Canada, USA, and Japan.*

My research is focused on uncovering empirical evidence and knowledge from data recorded in software repositories by using statistical analysis. The foundation for my Ph.D. thesis has been pub-

lished at Springer Journal of Empirical Software Engineering (EMSE), International Conference on Software Engineering (ICSE), International Conference on Mining Software Repositories (MSR), and International Conference on Software Analysis, Evolution, and Reengineering (SANER).

My publications and scholarly endeavors also have been acknowledged with numerous awards and scholarships, ranging from university-specific to nation-wide.
